EDUCATION

Ph.D., Chemical Physics	2015 – 2020
Department of Chemistry, Brown University	
M.Sc., Electrical & Computer Engineering	2016 – 2018
School of Engineering, Brown University	
B.S., Physics (with honors)	2011 – 2015
Department of Physics, Tsinghua University	

RESEARCH INTERESTS

quantum information science, quantum algorithms, quantum error correction and fault-tolerance, quantum chemistry and physics, quantum engineering

ACADEMIC APPOINTMENTS

Assistant Professor, NC State University , Raleigh NC	January 2024 - present
Department of Electrical and Computer Engineering, Department of Computer Science	

Adjunct Professor, NC State University , Raleigh NC	March 2024 - present
Department of Physics	

Postdoctoral Associate, Massachusetts Institute of Technology , Cambridge MA	July 2020 - December 2023
Department of Physics, Research Laboratory of Electronics	

HONORS & AWARDS

- Goodnight Early Career Innovator, NC State University, 2026
- Scialog Fellow on Quantum Information & Matter, 2025-2027
- ECE Rising Star Award, NC State University, 2025
- William R. Potter Prize (highest department honor), Brown University, May 2020
- Presidential Fellowship, Brown University, 2015 - 2018
- Tsinghua Academic Talent Scholarship, Tsinghua University, 2013 - 2015

THESIS

Ph.D. Thesis (Advisors: Brenda M. Rubenstein, Lai-Sheng Wang): *Finite Temperature Physics of Molecules and Solids via Auxiliary Field Quantum Monte Carlo and Observation of p-Type Dipole-Bound States Near the Molecular Threshold*.

B.S. Thesis (Advisor: Chuan-Gang Ning): *Calculation of Photoelectron Angular Distributions*.

CONFERENCE and SYMPOSIUM Presentations

- [29] (Invited) Talk on SIAM CSE27 Minisymposium on Input Models and State Preparation for Quantum Scientific Computing, Pittsburgh, PA, Feb 22-26, 2027.
- [28] (Invited) Talk "Advantage of Hybrid continuous-discrete-variable quantum computing" in KITP Workshop: Beyond Gate-Based Quantum Computing: Defining Quantum Advantage in the Pre-Fault Tolerant Era, Santa Barbara, CA, May 2026.
- [27] (Invited) Talk "Scalable Quantum Computational Chemistry: New primitives and paradigms" in Telluride workshop on "Quantum Computing for Quantum Chemistry, Molecular Dynamics, and Beyond", Telluride CO, March 30 - April 4, 2026
- [26] Girvin Fest: A Symposium Celebrating the Career of Steven Girvin: From Many Body to Many Qubits, Yale University, New Haven, CT Jan 9-10, 2026.

- [25] (Invited) Minisymposia: Quantum Scientific Computing in Engineering, the 9th Asian Pacific Congress on Computational Mechanics/The 7th Australasian Conference on Computational Mechanics (APCOM-ACCM 2025), Brisbane, Australia, 2025.
- [24] Talk on “Unification of finite symmetries in the simulation of many-body systems on quantum computers”, Conference on Quantum Simulation (QSim 2025), New York, August 4-8, 2025.
- [23] (Invited) Invited talk on “ $U(N)$ quantum signal processing and infinite-dimensional quantum linear algebra” at the Minisymposium SIAM-AN25: “Quantum Linear Algebra and Quantum Algorithms” (AN25), Montréal, Québec, Canada, July 28 - August 1, 2025.
- [22] (Tutorial) Tutorial on “Hybrid Oscillator-Qubit Quantum Processors: Instruction Set Architecture, Abstract Machine Models, and Applications”, International Symposium of Computer Architecture (ISCA 2025), Tokyo, Japan, June 21-25, 2025.
- [21] (Invited) Talk on “Towards Modular Quantum Software Systems via Quantum Signal Processing”, DIMACS workshop on Quantum Software Systems and Theory, Rutgers University at New Brunswick, New Jersey, May 16, 2025.
- [20] Talk on “Unification of finite symmetries in simulation of many-body systems on quantum computers” at the Quantum Computing Theory in Practice (QCTiP) conference, Berlin, Germany, April 23-25, 2025.
- [19] (Tutorial) Organizer and presenter of APS March-April Meeting (Global Physics Summit) Tutorial on “Hybrid Continuous-Discrete Variable Quantum Computation”, Anaheim CA, March 2025 (together with speakers from IBM, ETH Zurich, UMass Amherst).
- [18] (Invited) Southeast Quantum Workshop, Talk on “Hybrid Oscillator-Qubit Quantum Processors: Instruction Set Architectures, Abstract Machine Models, and Applications”, University of Tennessee, Knoxville, November 2024.
- [17] QuantumOS Workshop (QuantumOS), Poster on “Protocols and Applications of Quantum Stack Memory”, Austin TX, October 2024.
- [16] Southwest Quantum Information and Technology Workshop (SQuInT), Talk on “Hybrid Oscillator-Qubit Quantum Processors: Instruction Set Architectures, Abstract Machine Models, and Applications”, organized by the Center for Quantum Information and Control (CQuIC), Boulder CO, October 2024.
- [15] (Invited) Workshop on Quantum Computation Beyond Gate-model, “Hybrid Oscillator-Qubit Quantum Processors: Instruction Set Architectures, Abstract Machine Models, and Applications”, QuICS, University of Maryland, October 2024.
- [14] (Invited) 4th Annual Quantum Symposium at NC State University, “Toward Mixed Analog-Digital Quantum Signal Processing”, Raleigh, NC, June 2024.
- [13] American Conference on Theoretical Chemistry (ACTC), “Bootstrap embedding on a quantum computer”, Chapel Hill, June 2024.
- [12] (Invited) APS March Meeting, “Opportunities and challenges of bosonic oscillators for quantum computation and information processing”, in the “From NISQ to Fault Tolerance” Symposium, March 2024, Minneapolis MN.
- [11] (Theory Keynote) Co-Design Center for Quantum Advantage (C²QA) All Hands Meeting, “Instruction Set Architecture and Abstract Machine Models for Hybrid Oscillator-Qubit Processors”, Department of Energy, October 2023.

- [10] Quantum Sensing Gordon Research Seminar, "Quantum Advantage in Continuous-Variable Algorithmic Sensing", Les Diablerets, VD, Switzerland, July 2023.
- [9] (Invited) ACS Northeast Regional Meeting (NERM), "New quantum algorithms for old challenges: from real-time dynamics to electronic structure theory", Boston, June 2023.
- [8] Flash talk at the Co-Design Center for Quantum Advantage (C²QA) all hands meeting, "Bootstrap Embedding on a Quantum Computer", Yale University, October 2022.

- [4] Talk on *Bootstrap Embedding on a Quantum Computer*, Quantum Seminar at IBM Research, Cambridge MA, February 2023.
- [3] Talk on *Bootstrap Embedding on a Quantum Computer*, QuEra Computing Inc., November 2022.
- [2] Seminar (virtual) at the InQubator for Quantum Simulation, “Efficient-Fully Coherent Quantum Signal Processing Algorithms for Real-Time Dynamics Simulation”, University of Washington, November 2022.
- [1] Quanta Research Laboratory, “Double- and Multi-slit Interference of Photoelectrons from Organic Molecular Anions”, Massachusetts Institute of Technology, February 2020, Cambridge MA.

TEACHING

- (New course) Instructor, ECE 492 (061) / ECE 592 (061) / CSC 491 (007) *Introduction to Quantum System Engineering*, NC State University, Fall 2025. *(Created a new undergrad-level course to introduce the field of quantum information science and engineering to Engineering undergraduate students.)*
- (New course) Instructor, ECE 792-066 / CSC 791-025 *Quantum Algorithms for Physical Sciences*, NC State University, Spring 2024, 2025. *(Created a new graduate-level course on quantum algorithms and applications to physical science simulation in the Departments of Electrical & Computer Engineering and Computer Science.)*
- ECE 804 *Seminar in Communication and Signal Processing*, Fall 2024.
- Kaufman Teaching Certificate Program, Massachusetts Institute of Technology, Fall 2021. *(A semester-long workshop on developing teaching skills systematically, with two micro-teaching demonstrations in a real classroom setting)*

ADVISING & MENTORING

Postdocs:

- Jingchen Zhang, postdoc, NC State, August 2026 - present
- Joel Bierman, postdoc, NC State, May 2024 - present

Graduate students:

- Selina Nie, PhD (Computer Science), NC State (DoD NDSEG Fellow) – 2026 Fall incoming
- Jaehyun Lee, PhD (Computer Science), NC State – 2026 Fall incoming
- Sheng Chen, PhD (Electrical & Computer Engineering), NC State – 2026 Fall incoming
- Yongxiang Lyu, PhD (Electrical & Computer Engineering), NC State – 2026 Fall incoming
- Zhuozi Xie, PhD (Electrical & Computer Engineering), NC State – 2026 Fall incoming
- Adnan Abulfattah Adnan Jaljuli, PhD (Computer Science), NC State – 2026 Fall –.
- Pawan Sharma Poudel, PhD (Electrical & Computer Engineering), NC State – 2026 Fall incoming
- Kevin Joven, PhD (Electrical & Computer Engineering), NC State – 2025 Fall - present
- Mas Hakimi Heris, PhD (Electrical & Computer Engineering), NC State – 2025-present

- Fucheng Guo, PhD (Computer Science, co-advise with Dr. Frank Mueller), NC State – 2025-present
- Aishwarya Majumdar, PhD (Electrical & Computer Engineering), NC State – 2024-present
- Elin Ranjan Das, PhD (Electrical & Computer Engineering), NC State – 2024-present

Undergraduate Students:

- Marwan Abdelgawad, REU, Electrical and Computer Engineering, NC State University, 2027
- Brandon Wright, Computer Science, NC State University, 2029
- Samuel Firmansyah, REU, Computer Science, NC State University, 2028

Visiting Students:

- Jiaxin Ma, Undergraduate in Mathematics, Fudan University, Summer 2026.
- Yuanyi Zhang, Master student, Computer Science, Johns Hopkins University, May 2026 - present

Former Group Members:

- [Cheng Chu](#), postdoc, NC State, February 2026 - July 2026. → Assistant Professor of Computer Science in George Mason University.
- Nidhi Grover, REU, Computer Science, NC State University, Spring 2026
- Petr Shvarev, Undergrad '29, Computer Science, NC State University, Spring 2026
- Alexay Mehra, Undergrad '28 (Computer Engineering), Grand Challenges Scholars Program, Summer 2025.
- Coleman Hines (Mathematics, 2028), SEAS-PI program from Computer Science Department, NC State University
- Loren Holl (Computer Science, 2025), SEAS-PI program from Computer Science Department, NC State University
- Brayden Goldstein-Gelb (Computer Science, 2025), Brown University
- Shariful Islam, PhD (Physics), NC State – 2024 - Sept 2025
- Xi Lu, Ph.D. in Mathematics, Zhejiang University, Visiting scholar in the group July 2024 - August 2025. Now at NVidia.
- Weiyi An, Undergrad (Optoelectronic Information Science and Engineering), Huazhong University of Science and Technology, July - August 2025 (GEARS)
- Jiaqi Chai, Undergrad (Optoelectronic Information Science and Engineering), Southern University of Science and Technology (SUSTech), July - August 2025 (GEARS)
- Chenfeng Yang, Undergrad (Computer Science), City University of Hong Kong, July - August 2025 (GEARS)
- Kagwe Muchane (Computer Science, NC State), McNair Scholar, May-July 2025
- Daniel Dong, Masters (Computer Science) – 2024-2025
- Rosalie Rutten (Computer Science, August 2024 - May 2025)
- Nathan Woodward, visiting research scholar (ECE), NC State, June 2024 - April 2025
- Langxu Bai, Undergrad (Physics), Nankai University, 2024

- Anthony Donelli, Undergrad (Computer Engineering, 2025)
- Ruofei Liu, Undergrad (Mathematics and Physics + Mechanical Engineering), Tsinghua University, Jan-Feb 2025 (GEARS)
- Han Hao, Undergrad (TAQ Honor Program of Physics), Jilin University, Jan-Feb 2025 (GEARS)
- Anna Andriiko (Computer Science, 2024), NC State University.
- Jiyuan Liu, undergrad (Physics), Huazhong University of Science and Technology (HUST), Jan-Feb 2025 (GEARS)
- Manideepika Reddy Myaka, Masters (Computer Science), NC State – 2024
- Leonard Li, Undergrad (Computer Science & Technology), Nanjing University, July 2024 (GEARS). Now a PhD student in Computer Science at Stony Brook University.
- Lingjun Xiong, Undergrad (Physics), Huazhong University of Science and Technology (HUST), July 2024 (GEARS). Now PhD student in ECE at George Mason University.
- Nitin Joseph, Masters (Electrical & Computer Engineering), NC State – 2024
- Mihir Nikam, Masters (Computer Science), NC State – 2024

LEADERSHIP, SERVICE & OUTREACH

NC State

- Co-chair, Quantum Information Science and Engineering Qualify Exam Committee, Department of Electrical and Computer Engineering, Spring 2026.
- Member, Search Committee for the Head of Department of Computer Science, Fall 2025 - Spring 2026
- Co-chair (Fall 2024 and Spring 2025) and Committee Member (Fall 2024 - present), ECE Department Colloquium

Beyond NC State

- Editor, *Quantum Journal*, November 2025 - present
- Editorial Board Member, *Quantum Computing and Engineering Applications*, Elsevier, April 2026 - present
- Editorial Board Member, Column editor for the *Computer Magazine*, IEEE Computer Society, September 2025 - present
- Associate Member, Applied Signal Processing Systems Technical Committee (ASPS TC), IEEE Signal Processing Society.

Reviewer

- **Programs:** NSF: Mid-Scale Research Infrastructure (2024), ENG/ECCS (2024), Graduate Research Fellowships Program (GRFP, 2025)
- **Journals:** IEEE Transactions on [Signal Processing, Quantum Engineering], ACM [Computing Surveys], Reports on Progress in Physics, PRX Quantum, Quantum, Physical Review [Letters, A, B, R], npj Quantum Information, Quantum Science and Technology, New Journal of Physics, Communications Physics, Journal of Physical Chemistry, Journal of Chemical Theory and Computation, Chemical Physics, IEEE/CAA Journal of Automatica Sinica
- **Conferences:** QCTiP, IEEE QCE, ACM QuNet, ACM SPAA, HPCA

Conference Program Committee (PC), Organizer, Chair

- (upcoming) Organizer (chair), KITP long program “From Quantum Control to Algorithms and Back”, Kavli Institute for Theoretical Physics, UC Santa Barbara, Feb 14 to March 30, 2028.
- (upcoming) Local organization committee (chair), Conference on Quantum Simulation (QSim), North Carolina State University, June 2027.
- (upcoming) Program committee, 33rd Annual IEEE International Symposium on High Performance Computer Architecture (HPCA), Salt Lake City, Utah, March 2027.
- Organizing Committee, 2026 Quantum Summer Learning Workshop, NC State University, June 1-5, 2026.
- PC Member, QCCC-26: The 5th International Workshop on Quantum-Classical Cooperative Computing (ISCA '26 Workshop), Raleigh NC, June 2026.
- 2025 Annual Quantum Symposium, Chairman, NC State University, Raleigh NC, May 29-30, 2025.
- IEEE QEC'25, PC member, Technical Paper Track on Quantum Applications, Albuquerque, NM.
- QuNet workshop at the ACM Special Interest Group on Data Communication (SIGCOMM), PC member, Coimbra, Portugal, September 2025.
- ACM Symposium on Parallelism in Algorithms and Architectures (SPAA'25), PC member, Portland, OR, July 2025.
- Global Physics Summit (Joint APS March-April Meeting), Organizer, Tutorial of Hybrid Continuous-Discrete Variable Quantum Computation, Anaheim, CA, 2025.
- Session chair at 28th Annual Quantum Information Processing Conference (QIP 2025).
- Organizer, Special session on “Signal Processing and Quantum Computing” at the Information Theory and Application Workshop, University of San Diego, San Diego CA, 2024.
- IEEE QCE'24, PC member, Technical Paper Track on Quantum Applications, Montreal, Québec, Canada.
- Session chair for “Quantum Computing for Tackling Challenges in Quantum Chemistry Symposium”, ACS Fall Meeting, San Francisco, August 2023.
- Session chair for the quantum science and engineering center annual research conference (QuARC), Massachusetts Institute of Technology, February 2022.

Graduate Thesis and Exam Committees – Member, January 2024 - Present

NC State (PhD):

- Elaheh Karooby (Qing group, Physics, Ph.D. 2028 expected)
- Vinit Singh (Kais group, ECE, Ph.D. 2026 expected)
- Heba Labib (Kemper group, Physics, Ph.D. 2026 expected)
- Zachary Parks (Dreher Group, ECE, Ph.D. 2026 awarded)
- Huayue Gu (Yu Group, CSC, Ph.D. 2025 awarded)

NC State (Master):

- Dhaval Vaidya (Yu Group, CSC, Master 2026 awarded)

- Atulya Mahesh (Mueller group, Computer Engineering, Master awarded in May 2025)
- Amey Meher (Zhou Group, ECE, Master awarded in May 2024)

Non-NC State:

- Mathew Hagan (Nathan Wiebe group, Physics, University of Toronto, Ph.D. awarded in 2025)

Outreach

- Outreach lecture at Bexley high school (virtual, Ohio) on quantum science and technology via the Quantum To-Go project of American Physical Society, April 2023.
- Judge (multiple times) for K-12 Science and Engineering Fairs: Massachusetts Science & Engineering Fair, Boston MA, April 2021; Times Squared Academy Science and Engineering Fair, Providence RI, February 2020; Rhode Island Science and Engineering Fair, Community College of Rhode Island, April 2016.

GRANTS

Total awarded grants = \$11.895 M. Share to my research group = \$3.352 M.

1. *I-CORPS Quantum+X: Grand unification of quantum algorithms on photonic integrated circuits*, National Science Foundation. Co-Principal Investigator. 9/1/2026 - 8/31/2027. Total: \$50k. Share to my group: \$50k.

An NSF-funded entrepreneurship project to launch a quantum computing company focusing on quantum photonic chip development.

2. *I-CORPS Quantum+X: Accelerating Scientific Discovery and Engineering Modeling via Fault-Tolerant Modular Quantum Software*, National Science Foundation. Sole Principal Investigator. 9/1/2026 - 8/31/2027. Total: \$50k. Share to my group: \$50k.

An NSF-funded entrepreneurship project to launch a quantum computing company focusing on quantum algorithms for scientific discovery.

3. *Symmetry-Protected Decoherence-Free Molecular Qudit Quantum Computing*, Department of Energy, Office of Science, Basic Energy Sciences (BES), QIS-CSGB. Sole Principal Investigator. 8/1/2026 - 7/31/2029. Total: \$754k. Share to my group: \$754k.

A pioneering endeavor developing symmetry-based approaches to encode robust qudits in molecules and implement universal holonomic quantum gates using realistic molecular controls. By connecting molecular spectroscopy, quantum control, and quantum information science, the project advances new strategies for scalable molecular quantum computing.

4. *Achieving Quantum Utility with Hybrid Discrete Continuous Variable Quantum Processors*, Department of Energy, Office of Science, Advanced Scientific Computing Research (ASCR). Lead Principal Investigator (other collaborative institutions: Rutgers University, UMass Amherst, NASA Ames, PNNL, and LBNL). 9/1/2024 - 8/31/2029. Total: \$10.6M. Share to my group: \$2.23M.

A highly competitive large multi-year collaborative grants from DOE exploring the utility of a new type of quantum processors that are made of both qubits and quantum oscillators. The results from this research can change how future quantum computers are built and can bring significant quantum advantage for utilities in simulating materials and chemistry. [News Release](#)

5. *QACTI: Quantum Advantage-Class Trapped Ion Systems*, sub-award from Duke University, Design phase, project for National Quantum Virtual Laboratory (NVQL), National Science

Foundation. Application Thurst Lead. 9/1/2025 - 8/31/2026. Total: \$100k. Share to my group: \$30k.

One of the five National Quantum Virtual Laboratories (NQVL) funded by NSF. This is a > 10-year efforts to build large-scale quantum computers (256 qubits) based-on trapped ions. The resulting trapped-ion quantum computers will serve as a critical infrastructure that can be accessed through the cloud anywhere in the US for research use. [News Release](#)

6. *Travel: Student Travel Support for Workshop on Quantum Signal Processing during IEEE Quantum Week 2026*, National Science Foundation. Sole Principal Investigator. 06/01/2026 - 05/31/2027. Total: \$35k. Share: \$35k.
7. *Goodnight Early Career Award*, North Carolina State University. Sole Principal Investigator. 06/01/2026 - 05/31/2029. Total: \$66k. Share to my group: \$66k.
Prestigious award recognizing early-career faculty excellence, productivity, and innovation in STEM research with three years of unrestricted support to advance scholarship and research. [News Release](#)
8. *Quanta-Bind: Demystifying Proteins*, sub-award from qBraid, Inc, Wellcome Leap Foundation, Quantum4Bio program. 2024/1 - 2025/3. Share to my group: \$ 60k.
A pioneer research project exploring the utility of near-term quantum computers for biological applications, in collaboration with a leading quantum computing compnay qBraid, Inc., MIT, U Chicago. The aim is to unlock the potential of quantum computers for protein-ligand binding problem, which has significant impact for understanding neuro-degenerate diseases. The team was able to built a complete hybrid quantum-classical software pipeline that leverage small quantum computers to solve large biological problems.
9. *Phase Space Formulation and Simulation of Molecular Conical Intersections*, RQS Seed Funding, University of Maryland (UMD). Principal Investigator, in collaboration with NIST and UMD. 9/1/2024 - 8/31/2025. Total: \$80k. Share to my group: \$68k.
Highly competitive seed grant from UMD on exploring mathematical structures of molecuels for quantum information processing tasks. This project bridges the traditionally disconnected areas of quantum information and chemical physics, pioneering future molecular quantum error correcting code design and quantum molecular computing. This is in collaboration with a leading research Victor Albert from NIST and UMD.
10. *QACTI: Quantum Advantage-Class Trapped Ion Systems*, sub-award from Duke University, pilot project for National Quantum Virtual Laboratory (NVQL), National Science Foundation. 8/15/2024 - 7/31/2025. Total: \$ 100k. Share to my group: \$9k.
